

KEERTHANA A

Future Product Manager · Product Analyst · Business Analyst · AI-Powered Startup Operations

keerthanaaaa2003@gmail.com | +91 6282429982 | [LinkedIn](#) | [Portfolio Website](#) | Kerala, India

PROFESSIONAL SUMMARY

Future Product Manager, Product Analyst, and Business Analyst with hands-on experience in AI-powered business solutions, product analytics, digital marketing, and startup operations. Designed a 7-module AI Startup Operations Platform (CRM, analytics, automation, and financial management) and led Agile/Scrum delivery for a live platform serving 200+ users. Skilled in translating ambiguous business problems into structured, data-backed, scalable solutions — comfortable operating across product, growth, and operations in fast-moving, founder-led environments.

EXPERIENCE

Digital Marketing Intern | VaultCard — Women's Safety NFC Product 2023 – 2024

- **Owned end-to-end SEO strategy** (keyword research, on-page optimization, sitemap/robots.txt), growing organic search impressions by ~35% in 3 months; tracked weekly KPIs and reported campaign performance to stakeholders.
- **Planned and ran social media and email campaigns** via Canva, using audience segmentation and content scheduling to drive product launch — increased Instagram engagement rate by 28% over 2 months.

Marketing Executive | Overseas Educational Consultancy 2022 – 2025

- **Generated 50+ qualified leads per month** through targeted multi-channel outreach, managing the full acquisition pipeline from first contact to enrolment at a ~40% lead-to-conversion rate.
- **Standardized outreach workflows** and structured pipeline records, improving funnel visibility and reducing average follow-up cycle time.

Women in Power Representative | IEDC — Innovation & Entrepreneurship Development Cell 2022 – 2026

- **Coordinated 15+ entrepreneurship events**, seminars, and workshops reaching 100+ student participants, promoting women-led innovation through community and peer-mentorship programs.

Public Relations Team Member | ISTE — Indian Society for Technical Education 2022 – 2026

- **Led event promotion and outreach campaigns**, boosting technical event participation by 30% through targeted, cross-channel communication.

PROJECTS

Railway Foreign Object Detection System | AI / Computer Vision · Project Coordinator

- **Coordinated full project lifecycle** for an AI-powered railway safety system using computer vision and deep learning to detect track-side hazards in real time and alert authorities — tracked 5 key deliverables with zero missed deadlines.

AI Startup Operations Platform | Flagship Project · Product Planner · Business Process Designer

- **Architected a 7-module operations ecosystem** — AI Lead Intelligence, Startup CRM, Product Analytics, Business Intelligence, Executive KPI, AI Reporting Engine, and Operations Workspace — covering the full lifecycle from lead to decision.
- **Managed product lifecycle using Agile/Scrum** in Notion and Jira; mapped workflows and customer journeys across 4 cross-functional workstreams in Miro; defined 40+ user stories, sprint backlogs, and KPI frameworks across all modules.
- **Designed n8n automation concepts** projected to cut manual coordination effort by ~25%; built a premium Framer portfolio showcasing the platform.
- Live project: keerthanaa.github.io/ai-startup-operations-platform-v2

Alumni Portal | React.js / Node.js / Firebase · Scrum Manager

- **Ran sprint planning, backlog grooming, and cross-functional coordination** across 3 sprints — delivered 100% of milestones on time for a live platform serving 200+ alumni; owned QA and documentation.
